The Concept of Water - R D V Glasgow 2009

Water is commonly taken for granted and treated with contempt, yet it is the very foundation of human existence. Assuming countless forms, it is deeply associated both with life and death, body and soul, purity and pollution, creation and destruction.

"The Concept of Water" seeks to bring together the various aspects of our deeply ambiguous relationship with water, providing a systematic account of its symbolic and philosophical significance. This involves looking at how water has been conceived and the role it has played in everyday thought, mythology, literature, religion, philosophy, politics and science, both across cultures and through history. R. D. V. Glasgow was born in Sheffield and currently lives in Zaragoza. His previous books are "Madness, Masks and Laughter" (1995), "Split Down the Sides" (1997), and "The Comedy of Mind" (1999).

**5,000 Kilometers Per Second** - Manuele Fior 2016-04-06

Winner of the prestigious Grand Prize of the 2010 Angouleme Comics Festival, 5,000 Kilometers Per Second tells—or almost tells—the love story between Piero and Lucia, which begins with a casual glance exchanged by teenagers across the street through a window and ends with a last, desperate hook-up between two older, sadder one-time lovers. Executed in stunning watercolors and broken down into five chapters (set in Italy, Norway, Egypt, and Italy again), 5,000 Kilometers Per Second manages to refer to Piero and Lucia's actual love story only obliquely, focusing instead on its first stirrings and then episodes in their life during which they are separated—a narrative twist that makes it even more poignant and heart-wrenching. 5,000 Kilometers Per Second is another delicate graphic-novel masterpiece from Europe.

Has it all been too much for her recently? Is she hallucinating? Or is she the only girl in the world with a personal dragon at her service? Virginia Fox's debut novel tells the story of a young woman, her journey from just living to finding a purpose in life, all told in a light-hearted, humorous style. You will laugh and cry with her and you will be genuinely happy for her in the end. - Only it won't be the end. It will be the beginning of new adventures, because this is only part one of the author's trilogy. A book for dragon friends and animal lovers, looking for a little bit of magic in their life.

Women Philosophers in the Long Nineteenth Century - Dalia Nassar 2021-07-19

The long nineteenth-century--the period beginning with the French Revolution and ending with World War I--was a transformative period for women philosophers in German-speaking countries and contexts. The period spans romanticism and idealism, socialism, Nietzscheanism, and phenomenology, philosophical movements we most often associate with Hegel, Schopenhauer, Kierkegaard, Nietzsche, and Marx--but rarely with women. Yet women philosophers not only contributed to these movements, but also spearheaded debates about their social and political implications. While today their works are less well-known than those of their male contemporaries, many of these women philosophers were widely-read and influential in their own time. Their contributions shed important new light on nineteenth-century philosophy and philosophy more generally: revealing the extent to which various movements which we consider distinct were joined, and demonstrating the degree to which philosophy can transform lives and be transformed by lived experiences and practices. In the nineteenth century, women philosophers explored a wide range of philosophical topics and styles. Working within and in dialogue with popular philosophical movements, women philosophers helped shape philosophy's agenda and provided unique approaches to existential, political, aesthetic, and epistemological questions. Though largely deprived formal education and academic positions, women thinkers developed a way of philosophizing that was accessible, intuitive, and activist in spirit. The present volume makes available to English-language readers in many cases for the first time the works of nine women philosophers, with the hope of stimulating further interest in and scholarship on their works. The volume includes a comprehensive introduction to women philosophers in the nineteenth century and introduces each philosopher and her position. The translations are furnished with explanatory footnotes. The volume is designed to be accessible to students as well as scholars.

Her biting, informed commentary and ponytailed avatar guides the reader from the darkest chapters of history (a clitoridectomy performed on a five-year-old American child as late as 1948) to the lightest (vulvas used as architectural details as a symbol of protection). Like humorists Julie Doucet (*Dirty Plotte*), Alison Bechdel (*Dykes to Watch Out For*), and Kate Beaton (*Hark! A Vagrant*), she uses the comics medium to reveal uncomfortable truths about how far we haven't come.
