Exposing the Hidden Dangers of Iron - Eugene D. Weinberg 2004

Iron is one of the most frequently purchased over-the-counter supplements, second only to vitamin C and calcium. The danger is that, once absorbed, iron can only be excreted in minute amounts of less than one milligram a day (or by heavy blood loss), and excess iron collects in a person's vital organs, thus, setting the disease process under way. As organs literally rust away, patients can experience early death by heart attack, arthritis, liver, pancreatic and colon cancer, increased infections, cirrhosis, diabetes, neurological problems, loss of hearing, tinnitus, depression, impotence, and infertility. Scientists have now discovered a connection to iron imprompiety and Alzheimer's, early onset Parkinson's, Huntington's, attention deficit disorder, and epilepsy. EXPOSING THE HIDDEN DANGERS OF IRON is an

excellent introduction for medical professionals to the intricacies of iron in the various body systems. Containing a practical guide to diagnosis, it also includes such subjects as the treatment and management of iron-loading conditions, excellent reference charts, a large glossary of terms, additional resources, contact and treatment centers, and a complete bibliography. Cutting edge scientific findings are summarized, complete with endnotes and references, about the devastation of excess iron on the liver, pancreas, gallbladder, spleen, adrenals, kidneys, bone marrow, arteries, heart, pituitary, joints, lungs, hearing, skin, vision, and the brain.

Developing Sustainable Agriculture in Pakistan - Iqrar Ahmad Khan 2018-04-17
Agriculture plays a pivotal role in the economy and development of Pakistan providing food to consumers, raw materials to industries, and a market for industrial goods. Unfortunately, agricultural production is stagnant due to several barriers including a fixed cropping pattern, reliance on a few major crops, a narrow genetic pool, poor seed quality, and a changing climate. In addition, the high cost of production, weak phytosanitary compliance mechanisms, and a lack of cold chain facilities makes Pakistan agriculturally uncompetitive in export markets. Despite all these issues, agriculture is the primary industry in Pakistan and small farmers continue to

dominate the business. Small farmers grow crops for subsistence under a fixed cropping pattern and a holistic approach is required to develop agriculture to improve the livelihoods of the rural populace. This book presents an exhaustive look at agriculture in Pakistan. Chapters provide critical analyses of present trends, inadequacies in agriculture, strategic planning, improvement programs and policies while keeping in view the natural resources, plant- and animal-related agricultural production technologies, input supplies, population planning, migration and poverty, and balanced policies on finance, credit, marketing, and trade.
