

Phtls Prehospital Trauma Life Support Con Dvd

When somebody should go to the ebook stores, search establishment by shop, shelf by shelf, it is in fact problematic. This is why we provide the books compilations in this website. It will no question ease you to look guide **Phtls Prehospital Trauma Life Support Con Dvd** as you such as.

By searching the title, publisher, or authors of guide you in reality want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. If you wish to download and install the Phtls Prehospital Trauma Life Support Con Dvd, it is very simple then, previously currently we extend the colleague to buy and create bargains to download and install Phtls Prehospital Trauma Life Support Con Dvd hence simple!

Advanced Assessment and Treatment of Trauma - American Academy of Orthopaedic Surgeons (AAOS), 2009-10-23
Assessment and Treatment of Trauma (ATT) presents the state-of-the-art prehospital trauma assessment and management. Based on the most current medical information and best practices, this concise and highly interactive continuing education course covers the critical knowledge and skills necessary to rapidly evaluate, stabilize, and transport the trauma patient. The ATT textbook is the core of the ATT Course and is designed to give ALS-level prehospital providers the tools to effectively assess and treat trauma patients. ATT motivates and engages the student. It encourages solution-driven thinking through: Pictorial case studies, Controversy essays, Procedures. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

12 Lead ECG - Tomas B. Garcia 2001

Welcome to the comprehensive resource on 12-lead ECG! This all-encompassing 4-color text is designed to make you a fully advanced interpreter of ECGs. Whether you are an EMT, nurse, medical student, or physician wanting to learn or brush up on your knowledge of electrocardiography, this book will meet your needs. 12-Lead ECG: The Art of Interpretation takes the complex subject of electrocardiography and presents it in a simple, innovative, 3-level approach. Level 1 provides basic information for those with minimal experience interpreting ECGs. Level 2 provides intermediate information for those with a basic understanding of the principles of electrocardiography. Level 3 provides advanced information for those with some mastery of the subject. The entire text is written in a friendly, easy-to-read tone. Full-Size ECGs This text contains real-life full-size ECG strips! ECGs are integrated throughout the text and analyzed in conjunction with the concepts they illustrate.

PHTLS - Naemt 2010-12-07

As the required textbook for NAEMT's worldwide prehospital trauma life support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the 7th edition provides state-of-the-art, evidence-based trauma treatment and guidelines that are proven to reduce morbidity and mortality. Tailored expressly for the military environment, this book diverges in the last 12 chapters to reflect the special considerations of the military. These unique chapters are written by the Tactical Combat Casualty Care Committee on Trauma, the leading body that oversees trauma care. The Instructor's Electronic Resource CD-ROM is available for certified PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Provides CEUs for military prehospital care providers, first responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to support the profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage

incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A consistent approach for every body system makes it easy to reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. Three new Military Medicine chapters add to coverage for the military environment: Joint Theater Trauma System, Treatment of Burn Casualties in TCCC, and TCCC Casualty Response Planning. More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 20 fully re-shot demonstrations and four brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy; subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese (Mandarin)). Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course. *Pathophysiology of Disease: An Introduction to Clinical Medicine 7/E (ENHANCED EBOOK)* - Gary D. Hammer 2014-03-22
A full-color, case-based review of the essentials of pathophysiology--covering all major organs and systems The goal of this trusted text is to introduce you to clinical medicine by reviewing the pathophysiologic basis of 120 diseases (and associated signs and symptoms) commonly encountered in medical practice. The authors, all experts in their respective fields, have provided a concise review of relevant normal structure and function of each body system, followed by a description of the pathophysiologic mechanisms that underlie several common diseases related to that system. Each chapter of Pathophysiology of Disease concludes with a collection of case studies and questions designed to test your understanding of the pathophysiology of each clinical entity discussed. These case studies allow you to apply your knowledge to specific clinical situations. Detailed answers to each case study question are provided at the end of the book. This unique interweaving of physiological and pathological concepts will put you on the path

toward thinking about signs and symptoms in terms of their pathophysiologic basis, giving you an understanding of the "why" behind illness and treatment. Features 120 case studies (9 new) provide an opportunity for you to test your understanding of the pathophysiology of each clinical entity discussed. Checkpoint questions provide review and appear in every chapter. Updates and revisions throughout this new edition reflect the latest research and developments. Numerous tables and diagrams encapsulate important information. Updated references for each chapter topic. Pathophysiology of Disease is a true must-have resource for medical students preparing for the USMLE Step 1 exam, as well as students engaged in their clerkship studies. House officers, nurses, nurse practitioners, physicians' assistants, and allied health practitioners will find its concise presentation and broad scope a great help in facilitating their understanding of common disease entities.

PHTLS-FR - 2021

"Prehospital Trauma Life Support (PHTLS) is the comprehensive, internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. This textbook will now serve as a primary reference text for PHTLS courses, accompanied by a course manual. Fully revised and updated, the ninth edition provides trauma treatment and guidelines that are proven to reduce morbidity and mortality. Market Information: Appropriate for first responders"--

ITLS - John E. Campbell 2008

Rescuing Providence and Rescue 1 Responding - Michael Morse 2016-01-26

A Gripping Account of Life as a First Responder Michael Morse, an eighteen year veteran firefighter and EMT, takes you along for the ride as he and his fellow officers respond to emergency calls on the streets of Providence, RI. Race from one call to the next as Morse goes from facing life and death emergencies to treating minor injuries and carting drunks to detox. See for yourself how difficult, frustrating and at times heartbreaking this job can be, as lives are lost, scarce medical resources squandered and futures altered. Experience the heartache and joy of losing and saving lives during this incredible journey. The story that unfolds is true and the people are real. This edition includes Michael Morse's *Rescuing Providence and Rescue 1 Responding*.

Oh Manuale di terapia intensiva - Neil Soni

2015-10-01T00:00:00+02:00

La nuova edizione di questo volume, considerato uno dei testi base della terapia intensiva ha mantenuto la completezza e la chiarezza che ne hanno garantito il successo nelle precedenti edizioni. Il volume consente un rapido accesso a informazioni chiare sulla gestione di patologie e problemi relativi al paziente critico.

Paramedic Care - Bryan E. Bledsoe 2016

Resource added for the Emergency Medical Technician program 305313.

PHTLS. Con DVD - 2011

Storia, filosofia ed etica generale della medicina - Luciana R. Angeletti 2008

Anatomy and Physiology for Health Professionals - Jahangir Moini 2015-01-21

Preceded by *Anatomy and physiology for health professionals* / Jahangir Moini. c2012.

Mosby's Dictionary of Medicine, Nursing & Health Professions - Mosby, Inc 2009

A completely revised dictionary offering more than fifty-one thousand entries and twenty-four hundred full-color illustrations features a color atlas of human anatomy, expanded definitions, and thumb tabs for fast reference.

PHTLS:Trauma First Response - Naemt 2016-05-11

As the required textbook for NAEMT's Trauma First Response course, PHTLS Trauma First Response delivers comprehensive, evidence-based guidelines culled from NAEMT's internationally renowned Prehospital Trauma Life Support, 7th Edition text to help you provide the most effective pre-EMS trauma treatment. It's the perfect book for first responders, police, officers, firefighters, rescue personnel, and safety officers!

PHTLS. Prehospital trauma life support. Con DVD. Ediz. italiana - M. Santarelli 2007

JRCALC Clinical Guidelines 2019 - Association of Ambulance Chief Executives 2019-08-05

The Joint Royal Colleges Ambulance Liaison Committee guidelines are the essential resource for paramedics. The 2019 edition of the book has been brought up to date with the latest evidence and developments in clinical practice. JRCALC combines expert advice with practical guidance to help paramedics in their challenging roles with the overall objective of improving patient care. Key updates are: •Resuscitation and cardiac arrest. The pathophysiology of cardiac arrest, checklist use and pulseless electrical activity is discussed extensively within the context of every day out of hospital practice. A new guideline on tracheostomy and laryngectomy is included, alongside clinical skills photographs. •Consent and patient confidentiality. The guideline is brought up to date with the Data Protection Act 2018 following the General Data Protection Regulations. •Mental health presentation: crisis, distress and disordered behaviour. A reviewed guideline supports the clinician with practical help on the assessment and management of different mental health illnesses. •Major, complex and high risk incidents. A revision by the National Ambulance Resilience Unit covers poisons, rail incidents and police incapacitants. •New medicines are included: Activated charcoal, duodote and morphine sulfate for end of life care. •Other reviews and updates include: head injury, hyperventilation syndrome, stroke, respiratory illness in children and acute coronary syndrome.

Revista Brasileira de medicina - 2007

PSG

PHTLS secours et soins préhospitaliers aux traumatisés, 4e - NAEMT 2012-10-10

Le PHTLS (Pre Hospital Trauma Life Support) aborde la gestion des patients traumatisés en pratique préhospitalière. Il est fondé sur le concept de "evidence based medicine" et remis à jour tous les 4-5 ans. Aéré et pratique, avec une riche icono couleur, l'ouvrage offre une approche pédagogique permettant aux intervenants d'évaluer l'état de gravité du patient et de développer une stratégie thérapeutique adaptée. Sont ici étudiées l'anatomie, la physiologie et la physiopathologie du corps humain, ainsi que la prise en charge des traumatismes. Nouveau dans la 7e édition américaine: dont 4 nouvelles ; Mise à jour des photographies démontrant les concepts et les techniques clés ; Ajout d'un nouveau chapitre " Art et science de la médecine" ; Mise à jour et étoffement des chapitres sur les explosifs et les armes de destruction massive et sur la gestion des événements catastrophiques.

Khan's the Physics of Radiation Therapy - Faiz M. Khan 2014

This classic full-color text helps the entire radiation therapy team-- radiation oncologists, medical physicists, dosimetrists, and radiation therapists develop a thorough understanding of 3D conformal radiotherapy (3D-CRT), stereotactic radiosurgery (SRS), high dose-rate remote afterloaders (HDR), intensity modulated radiation therapy (IMRT), image-guided radiation therapy (IGRT), Volumetric Modulated Arc Therapy (VMAT), and proton beam therapy, as well as the physical concepts underlying treatment planning, treatment delivery, and dosimetry.

TECC: Tactical Emergency Casualty Care - National Association of Emergency Medical Technicians (U.S.) 2019-06-24

The Tactical Emergency Casualty Care Course Manual is the printed component for the NAEMT's 16-hour continuing education Tactical Emergency Casualty Care (TECC) Course. It may be used by both instructors and students as a resource to prepare for the TECC course and as a reference that discusses the current best practices for EMS providers to utilize in the response to and care of patients in a civilian tactical environment. The TECC Course does not offer certification as a tactical medic it is intended to teach all EMS providers the best patient care and safety practices in a civilian tactical environment, such as an active shooting hostile event. Composed of 10 lessons, The TECC Course Manual will: Cover the phases of care in a civilian tactical environment,

Describe step-by-step the life-saving skills that may be performed in a civilian tactical environment, Provide safety and survival strategies for EMS providers and their patients In addition to the TECC Course Manual, instructors may also purchase the TECC Online Instructors Toolkit (9781284483888). This resource features 10 lesson presentations in PPT, as well as interactive patient simulations and skill stations that allow students to gain experience in a safe environment monitored by experienced EMS providers.

Pediatrics in Systemic Autoimmune Diseases - Rolando Cimaz 2007-11-13

Many of the systemic autoimmune diseases seen in children are different from those seen in adults making them a special problem for physicians and scientists who care for the affected children and study their diseases. Benefiting both pediatric and adult rheumatologists, as well as physicians from other specialties, this volume covers the latest advances in pathogenesis and clinical management of common conditions seen in pediatric rheumatology practices.

Rescue 911 - Michael Morse 2017-10-10

First responders often don't tell stories, preferring to keep what happens at work private. Rescue Captain Michael Morse changes that with these heartfelt descriptions of hundreds of emergency calls, with the usual coverings peeled back, exposing the bizarre, heartbreaking, and often hilarious reactions to 911 emergencies.

12-lead ECG - Tomas B. Garcia 2013-11-13

Welcome to the most comprehensive resource on 12-Lead ECG interpretation! This all-encompassing, four-color text, updated to the new Second Edition, is designed to make you a fully advanced interpreter of ECGs. Whether you are paramedic, nurse, nurse practitioner, physician assistant, medical student, or physician wanting to learn or brush up on your knowledge of electrocardiography, this book will meet your needs. 12-Lead ECG: The Art of Interpretation, Second Edition takes the complex subject of electrocardiography and presents it in a simple, innovative, 3-level approach. Level 1 provides basic information for those with minimal experience interpreting ECGs. Level 2 provides intermediate information for those with a basic understanding of the principles of electrocardiography. Level 3 provides advanced information for those with some mastery of the subject. The entire text is written in a friendly, easy-to-read tone. Additionally, the text contains real-life, full-size ECG strips that are integrated throughout the text and analyzed in conjunction with the concepts they illustrate.

The ICU Book - Paul L. Marino 2012-02-13

This best-selling resource provides a general overview and basic information for all adult intensive care units. The material is presented in a brief and quick-access format which allows for topic and exam review. It provides enough detailed and specific information to address most all questions and problems that arise in the ICU. Emphasis on fundamental principles in the text should prove useful for patient care outside the ICU as well. New chapters in this edition include hyperthermia and hypothermia syndromes; infection control in the ICU; and severe airflow obstruction. Sections have been reorganized and consolidated when appropriate to reinforce concepts.

Segni e sintomi nella medicina d'emergenza - Mark A Davis 2015-10-01T00:00:00+02:00

Questo manuale propone un approccio sintetico e schematico per sintomi che facilita la consultazione per il medico che deve affrontare una situazione di emergenza e porvi rimedio in tempi molto limitati.

PHTLS - 2003

Prehospital Trauma Life Support (PHTLS) revised reprint, is a unique, continuing education program that directly addresses trauma issues in the prehospital environment. Following the publication cycle of ATLS (Advanced Trauma Life Support) by the Committee on Trauma of the American College of Surgeons, the PHTLS program is designed to enhance and increase knowledge and skill in delivering trauma care. This revised fifth edition of the PHTLS textbook is the required book for the PHTLS course, and is also ideal for use as the trauma component of a paramedic course or as a general reference book on trauma assessment and management. It combines both basic and advanced trauma concepts and skills in one definitive resource and now features an

entirely new chapter on evidence-based guidelines for military medicine, developed by the Committee on Tactical Combat Casualty Care. PLEASE NOTE: The Instructor's Manual and Slide Set are available for certified PHTLS Instructors ONLY. They are ordered through Mosby but customers must first obtain an "access code" from the National PHTLS office - (800) 94-PHTLS or (601) 924-7744. Individuals may also call the above numbers for information on HOW TO BECOME A PHTLS INSTRUCTOR. PHTLS Course Features: Provides CEUs for First Responders, EMTs, paramedics, nurses, & physicians; Proceeds from the course go to the NAEMT and thus are used to support the profession; It improves the quality of care (Research is available); Can be incorporated into initial training or as a stand-alone continuing education course; Promotes critical thinking as the foundation for providing quality care. PHTLS (Prehospital Trauma Life Support) is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. The PHTLS textbook is the required book for official PHTLS courses. However, it can also be used outside of the course, adopted or purchased as a stand-alone textbook or reference book. This one book covers both basic and advanced level training. More information on kinematics than any similar book on the market. Airway, Thoracic and Spinal Skills are presented in a heavily illustrated, step-by-step format. Consistent approach! Each body region chapter features info on anatomy and physiology, pathophysiology, assessment and management giving the reader a systematic way of looking at trauma. Chapter pedagogy includes: objectives, opening case scenario and scenario conclusion at the end of chapter, summary, review questions. Features a separate chapter on trauma care for the Military. NEW TO THE REVISED 5TH EDITION: UPDATED and EXPANDED chapter on Military Medicine to reflect the new evidence based guidelines for prehospital care in the tactical environment. This new content was developed in 2002 by the Committee on Tactical Combat Casualty Care, comprised of trauma specialists, operational medical officers, and combat medical personnel. NEW TO THE 5TH EDITION: NEW! A Companion CD-ROM is now included with every book. Contains video clips of all different airway and spinal skills used in PHTLS. Also includes info to download onto a PDA (such as the Glasgow Coma Scale, Revised Trauma Score, Rule of 9's, Parkland Formula and Pediatric Vital Signs). NEW! Chapter on Injury Prevention. Provides the reader with information on preventing injuries within their community. NEW! Chapter on Triage, Transport and Trauma Systems. Provides the reader with a "pull it all together" concept of how to triage a trauma patient, how and when to transport a trauma patient and where to transport a trauma patient. NEW! Chapter on the Golden Principles of Prehospital Trauma Care. Provides the reader with guidelines to put all the information together and critically think through every trauma patient. NEW! Information on prolonged transportation. NEW! References for every chapter and suggested reading lists. Providing evidence based prehospital trauma care. NEW! Drug table for commonly used drugs for pharmacologically assisted intubation. Provides general guidelines of current accepted drug use for intubation. NEW! Spinal Immobilization algorithm. Provides general guidelines for when spinal immobilization is appropriate for a trauma patient. ALL NEW PHOTOS! An entirely new set of photographs for the skills portion of this text. NEW! Face to Face Intubation is a procedure that provides advanced providers with an alternative method of intubating a trauma patient. NEW SPINAL SKILLS! - 2 person technique for standing longboard application and 2-person rapid extrication. Revised - Head Trauma chapter. Expanded coverage of the pathophysiology of secondary brain injury. Expanded coverage of the management of traumatic brain injury. Also now includes information on management of brain injury during prolonged transportation. Revised: Shock chapter. Now provides information on the complications of shock, expanded coverage on the assessment and confounding factors that contribute to shock, specific guidelines for appropriate use of the Pneumatic Antishock Garment (PASG), and more. Expanded! The Patient Assessment and Management chapter now includes expanded information on hemorrhage control and evaluating level of consciousness at the scene, pain management and assessing of domestic abuse.

Expanded! Chapter on trauma in the elderly. Expanded coverage on the systematic effects of aging, the common mechanisms of injury in the elderly and special considerations in the management of the elderly in an ABCDE approach. COMPANION CD-ROM: Includes video presentations of more than 20 skills being performed in "real-time." These skills include: Airway Maneuvers, Dual Lumen Device insertion, Endotracheal Intubation (traditional, face-to-face, nasal), Helmet Removal techniques, Rapid Extrication (2 person and +2person), Standing Longboard Application (2 person and +2 person), and more!

Basic Arrhythmias - Gail Walraven 2014-01-30

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This classic, best-selling book has been completely updated and revised to reflect the latest knowledge in the field! Basic Arrhythmias, Seventh Edition covers all the basics of arrhythmia interpretation and includes appendices on Clinical Implications, Cardiac Anatomy and Physiology, 12 Lead Electrocardiography, Basic 12 Lead Interpretation, and Pathophysiology of Arrhythmias. The author takes great care in presenting a difficult topic in an easy manner with a building block approach. Some features to this updated edition include: Over 600 practice strips included in the book. Covers Clinical Implications, Cardiac Anatomy & Physiology, 12 Lead Electrocardiography, Basic 12 Lead Interpretation, and Pacemakers, now includes a new section on Pathophysiology of Arrhythmias. Full color texts, along with full color, tear-out flash cards for learning practice. Flexible, self-instructional format allows for self-paced or classroom learning. Key points and self-tests in every chapter for quick review and self-evaluation. "Final Challenge" self-test at the end of book helps students evaluate their comprehension of material. Clearly written, well-organized, and easy to understand. This is a perfect resource for any practicing health care professionals who need to learn or review basic EKG or arrhythmia concepts. This new Seventh Edition program features mybradykit, an online site providing extensive study resources, learning tools, and interactive exercises. An access code to mybradykit is provided in the front of the text.

Textbook of Emergency Medicine - Suresh David 2011-01-01

Textbook of Emergency Medicine (Vol. 1 and 2) is a comprehensive and contemporary exposition of the vast array of disorders and emergencies that might present to the emergency or casualty department of a hospital.

Emergency Cardiac Care - W. Brian Gibler 1994

PHTLS: Prehospital Trauma Life Support, Military Edition - National Association of Emergency Medical Technicians 2019-10

PHTLS: Prehospital Trauma Life Support, Military Edition consists of the PHTLS core content and features thirteen chapters written by military prehospital trauma care experts for practitioners in the military environment. PHTLS: Prehospital Trauma Life Support, Military Edition is created in partnership between the National Association of Emergency

Major Incident Medical Management and Support - Advanced Life Support Group (ALSG) 2019-01-04

The new edition of Major Incident Medical Management and Support is a vital component in the blended learning course from Advanced Life Support Group (ALSG), which aims to provide hospital staff at all levels with essential information on the preparation, management and support elements of dealing with casualties in a major incident. Split into five sections, each focuses on the elements requisite in preparing for, and responding, to a major incident. The first section discusses the epidemiology and incidences of major incidents and the structured approach to the hospital response. The second section contains the preparation required in planning for major incidents, including equipment and training. The third section covers the management of a major incident, concentrating on the clinical, nursing and management hierarchies. The fourth includes the various stages of support in a major incident, including declaring an incident and activating the plan, the reception, triage, definitive care and recovery phases of an incident. The final section focuses on special incidents which require additional consideration, including those involving hazardous chemicals, burns and children. Written in collaboration with the National Emergency Planning, Major Incident Medical

Management and Support is an invaluable reference in the emergency department and beyond for staff needing to prepare for the rare, but inevitable, hospital major incidence response. PHTLS Prehospital Trauma Life Support - 2018-10-15
PHTLS, Ninth Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination.

Introduction to 12-Lead ECG: The Art of Interpretation - Garcia 2002-04-08

This text is a comprehensive guide for beginners with minimal experience interpreting ECGs. The chapters provide a basic understanding of the components of an ECG as well as introduce the important topics of acute myocardial infarction, hypertrophy, and bundle branch blocks. Real-life, full-size, four-color ECGs with basic interpretations are included to help students put it all together. Additional resources are available at www.12LeadECG.com.

Il monitoraggio emodinamico in area critica - Fabio Guarracino 2015-10-01T00:00:00+02:00

Questo volume è una guida alla scelta del sistema di monitoraggio più utile nelle diverse situazioni cliniche. Senza indicare a priori le preferenze per una metodica o l'altra, fornisce informazioni per individuare il metodo più appropriato a monitorizzare le variabili emodinamiche negli scenari di area critica. In situazioni cliniche complesse il monitoraggio emodinamico ha un ruolo rilevante in quanto consente di valutare i parametri di funzione del sistema cardiovascolare, e di seguire la risposta del sistema alle cure messe in atto. In questo senso ha quindi un compito di verifica continua della diagnosi e del trattamento.

International Trauma Life Support for Emergency Care Providers: Pearson New International Edition - . . . International Trauma Life Support (ITLS) 2013-08-27

Text only. This product does NOT include a Resource Central Access Code Card. To purchase the text with a Resource Central Access Code Card, please use ISBN: 0-13-281811-6 For more than 30 years, International Trauma Life Support has been at the forefront of trauma education at all levels of emergency care worldwide. This practical, hands-on training offers a complete reference covering all skills necessary for rapid assessment, resuscitation, stabilization, and transportation of the trauma patient. Updated with new photos and the latest approaches to the care of the trauma patient, this seventh edition conforms to the most recent AHA/ILCOR guidelines for artificial ventilation and CPR.

Nancy Caroline's Emergency Care in the Streets - American Academy of Orthopaedic Surgeons (AAOS), 2010-02-05

Think back to a time when paramedics didn't exist. When "drivers" simply brought injured patients to the hospital. When the EMS industry was in its infancy. A time before Nancy Caroline. Dr. Caroline's work transformed EMS and the entire paramedic field. She created the first national standard curriculum for paramedic training in the United States. She also wrote the first paramedic textbook: *Emergency Care in the Streets*. The impact that Dr. Caroline had on EMS and health care spanned across the U.S. and abroad. From establishing EMS systems to training paramedics, to providing better nourishment and health care for orphans, her work had a profound impact on humanity. Throughout her life, Dr. Caroline brought a sense of excitement, joy, and humor to her work. The American Academy of Orthopaedic Surgeons is proud to continue Dr. Caroline's legacy. Her sense of excitement and humor live on in this text, which is dedicated to her. The Sixth Edition honors Dr. Caroline's work with a clear, fun, understandable writing style for which she was known. Welcome back a familiar training companion to your classroom! Say hello to Sidney Sinus, AV Abe, and a cast of memorable characters and amusing anecdotes. Make learning for your students more fun!

Pediatric Advanced Life Support Provider Manual (International English) - American Heart Association 2020-10-21 20-2811

PHTLS - Prehospital Trauma Life Support - Naemt 2011-02-25
This is a Pageburst digital textbook; As the required textbook for NAEMT's worldwide prehospital trauma life support course, Prehospital Trauma Life Support (PHTLS) is the comprehensive,

internationally renowned resource for learning basic and advanced prehospital trauma skills and concepts. Fully revised and updated, the 7th edition provides state-of-the-art, evidence-based trauma treatment and guidelines that are proven to reduce morbidity and mortality, and is also an ideal tool for studying EMT or paramedic skills and a helpful general reference on trauma assessment and management. The Instructor's Electronic Resource CD-ROM is available for certified PHTLS instructors only. It can be ordered through Elsevier/MosbyJems, but customers must first obtain an access code from the National PHTLS office at 1-800-94-PHTLS or 1-601-924-7744. Individuals may also call the above numbers for information on How to Become a PHTLS Instructor. Elsevier is proud to announce Prehospital Trauma Life Support (PHTLS) Online Continuing Education, the latest addition to NAEMT's worldwide PHTLS educational content. PHTLS Online Continuing Education includes videos, animations, and interactive exercises, along with reading assignments that direct you to the related content in the PHTLS 7th Edition book. Plus, online feedback is provided for self-assessment questions in each module, allowing you to measure your comprehension. A post-test at the end of the final module will check your retention of the online content. Visit at <http://phtls.centrelearn.com> to earn 8 hours of CECBEMS continuing education credit by successfully completing all modules of PHTLS Online Continuing Education. Please note: NO PHTLS CARD WILL BE ISSUED. PHTLS Hybrid courses are available only through the NAEMT. Visit the Education section of the NAEMT website www.naemt.org for more information. This is a Pageburst digital textbook; Provides CEUs for First Responders, EMTs, paramedics, nurses, and physicians; proceeds from the course go to the NAEMT and are used to support the profession; helps you improve the quality of care (based on available research); can be incorporated into initial training or as a stand-alone continuing education course; promotes critical thinking as the foundation for providing quality care. PHTLS is a continuing education program authored and administered by the PHTLS division of the National Association of EMTs (NAEMT) in conjunction with the Committee on Trauma of the American College of Surgeons. Comprehensive, evidenced-based coverage incorporates the latest research across all aspects of prehospital trauma in one convenient resource. Heavily illustrated presentation guides you step-by-step through essential airway, thoracic, and spinal skills. Each chapter details important prolonged transportation guidelines. Includes more information on kinematics than any similar book on the market. A

consistent approach for every body system helps you easily reference key content on anatomy and physiology, pathophysiology, and assessment and management. Chapter Objectives and closing Summaries break down must-know information for each chapter. Two Environmental Trauma chapters provide response protocols for a wide variety of environmental emergencies. Wilderness Trauma Care chapter helps you confidently treat trauma patients in wilderness situations and includes information on extended transport times. Civilian Tactical EMS chapter details steps you can take to support police operations, promote crime scene awareness, and apply PHTLS concepts to civilian tactical settings. Burns chapter guides you through the treatment of burn trauma patients. More than 30 video demonstrations on the companion DVD provide step-by-step procedural guidance for key skills, including 4 brand-new skills for King Airway, Sitting Immobilization (Vest Type), Cervical Collar Sizing and Application, and Needle Cricothyrotomy. Extensively updated photos clarify key concepts and techniques. New Art and Science of Medicine chapter helps you build the critical thinking skills to determine the best way to manage trauma patients based on each individual situation and condition. Expanded chapter on Explosives and Other Weapons of Mass Destruction outlines essential steps for responding to accidents involving biological, nuclear, incendiary, chemical, or explosive agents. Updated Disaster Management chapter details the latest management techniques and protocols. All-new Scenarios and Scenario Solutions in each chapter challenge you to apply treatment concepts to realistic situations you may encounter in the field. Enhanced organization reflects the most up-to-date research and mirrors the content and presentation of the American College of Surgeons' Advanced Trauma Life Support (ATLS) 8th Edition course. Updated Companion DVD includes 9 new narrations and 20 fully re-shot demonstrations and subtitles are available in eight languages (Danish, Dutch, English, French, Portuguese, Spanish, German, and Chinese (Mandarin)).

Anestesiologia: Processo decisionale - Lois L. Bready
2015-10-01T00:00:00+02:00

Il principale scopo di questo manuale, giunto alla quarta edizione, è quello di rappresentare il processo di gestione dell'anestesia attraverso una struttura ad alberi decisionali. Questo tipo di struttura stimola il lettore a pensare in modo sistematico e a seguire una sequenza logica durante tutta la valutazione e la preparazione preoperatoria, la gestione intraoperatoria e le considerazioni post-operatorie.
