In southern California, nearly a half century ago, a small band of researchers – equipped with a new 200-inch telescope and a faith born of scientific optimism – embarked on the greatest intellectual adventure in the history of humankind: the search for the origin and fate of the universe. Their quest would eventually engulf all of physics and astronomy, leading not only to the discovery of quasars, black holes, and shadow matter but also to fame, controversy, and Nobel Prizes. *Lonely Hearts of the Cosmos* tells the story of the men and women who have taken eternity on their shoulders and stormed nature in search of answers to the deepest questions we know to ask. "Written with such wit and verve that it is hard not to zip through in one sitting." –Washington Post

DRG EXPERT - 2022

Electric Universe - David Bodanis 2006-02-28

The bestselling author of $E=mc^2$ weaves tales of romance, divine inspiration, and fraud through an account of the invisible force that permeates our universe—electricity—and introduces us to the virtuoso scientists who plumbed its secrets. For centuries, electricity was seen as little more than a curious property of certain substances that sparked when rubbed. Then, in the 1790s, Alessandro Volta began the scientific investigation that ignited an explosion of

knowledge and invention. The force that once seemed inconsequential was revealed to be responsible for everything from the structure of the atom to the functioning of our brains. In harnessing its power, we have created a world of wonders—complete with roller coasters and radar, computer networks and psychopharmaceuticals. In *Electric Universe*, the great discoverers come to life in all their brilliance and idiosyncrasy, including the visionary Michael Faraday, who struggled against the prejudices of the British class system, and Samuel Morse, a painter who, before inventing the telegraph, ran for mayor of New York City on a platform of persecuting Catholics. Here too is Alan Turing, whose dream of a marvelous thinking machine—what we know as the computer—was met with indifference, and who ended his life in despair after British authorities forced him to undergo experimental treatments to “cure” his homosexuality. From the frigid waters of the Atlantic to the streets of Hamburg during a World War II firestorm to the interior of the human body, *Electric Universe* is a mesmerizing journey of discovery.

Janey the Vet - Janey Lowes 2020-03-19

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

The Bully Killer - Tommy Beartooth 2000-06

The Bully Killer describes the life of Big Bull Chaney, the worst bully in Texas/New Mexico history, his upbringing and his lowlife associates who raise hell at a nightclub in El Paso called Wild Eyes. Bull Chaney started with bad genetics—his vicious parents, and began his criminal hobby of bullying in elementary school. Raised in an atmosphere of outrageous cruelty against animals, with his uncle Jeeter running an organized dog fighting ring, Big Bull Chaney grows to be close to seven feet tall and over 300 pounds. He inherits a beer distributorship from his father who bought it with pirated funds, and who is unexpectedly killed while choking an outlaw biker at Wild Eyes. Bull has many successes in bullying other men; however, his luck turns bad when, at an international festival in El Paso, he confronts a giant Viking strongman and a Kung Fu expert from Asia, and he realizes that either of these men could easily destroy him! His ego having suffered major damage, he resolves to find someone that very day on whom he can take out his rage and wrath. While still at the festival, he sees Nikos Diamantopoulos, a 14-year old boy, dressed in an ethnic Greek costume from a closed era, something like a Scottish kilt. The costume infuriates Bull who, with his cowboy, blue jeans, and monster truck mentality, vows to catch Nikos and deal

him a severe lesson. Bull finds Nikos walking home through a dark neighborhood and sets two of his killer dogs on the boy, who is badly injured, yet saved from death by his brave dog Rocket, who arrived and diverted the violence to himself. Bull leaves Nikos atop a fire ant mound, worsening his injuries. By means of a fortunate chain of events, a high tech medicine man, Ray Singing Fire, who has boyhood debts to two Greeks, enters the picture and vows to right things for Nikos. Unfortunately for Big Bull Chaney, Singing Fire has many of the same Kung Fu skills as Chang Tien Ming, one of the men who made Bull back away at the El Paso festival. Singing Fire corners Bull at Wild Eyes and, in front of his own criminal associates, gives Bull a gut wrenching lesson about stinging insects, feeling this appropriate retribution for the many fire ant stings Nikos took. Additionally, Singing Fire does major damage to Bull's beer distributorship, causing a steep decline in sales through a clandestine mailing to its customers. Now the angriest man on earth, Bull plans revenge on the Indian medicine man, but cannot locate him. An effort to find Nikos also failed. In frustration, Bull journeys to Eagle Pass, Texas, to visit uncle Jeeter about the problem, who then consults with the Chaney family attorney, Wade Blankenship. The lawyer calls a Mafia phone number, and arranges to bring in a Greek speaking gangster to act as a spy to locate Nikos. With the confidence of Nikos clergyman gained, the spy locates Nikos, who is then kidnapped, along with his doctor and his parents. A video of the victims being menaced by Bull's killer dogs is sent to the Greek Orthodox priest, who then contacts Singing Fire at his reclusive New Mexico home. The medicine man must devise a way to save the victims from Big Bull Chaney, who plans to execute them by dog mauling at a secretive dog fighting site in remote West Texas, in full view of around 100 criminals invited from all over the United States. The climax of chapter 5 illustrates that those who are wantonly violent usually encounter someone they cannot face, as Bull dies under the claws and teeth

of the medicine man's wolverine, a weapon he desperately tries to avoid using. Chapter 6 depicts Bull suffering in hell, the fate unquestionably awaiting all bullies, but it also details the restoration of Nikos to a normal life through regenerative medicine; portrays his dog Rocket at the gates of heaven; and his new companion dog, Rocket II, graciously arranged for his by the veterinarian, Ed Landerholme, who was able to salva
