## **Soil and Water Conservation Structures Design** - Rajendra Singh 2023-01-31

The book is designed to serve as a textbook for graduate and undergraduate courses on soil and water conservation engineering for students of agricultural engineering, civil engineering, environmental engineering and related disciplines. The book presents the basics of soil and water erosion, and describes the measures to control erosion, focusing on structures to prevent and control erosion. The chapters dedicated to erosion control

structures provide a detailed view of each structural construction, covering the function, design and elements of each type of structure. Some common type of structures covered in the book are terrace, bunds, vegetated waterways, and gully control structures, including spillways. The book also covers wind erosion and control structures to prevent wind erosion. Each chapter includes pedagogical elements such as examples, practice questions, and multiple-choice-type questions to improve understanding and aid in self-study. Besides serving as a textbook university coursework, the book can also serve as a supplementary or primary text for professional development courses for practicing engineers engaged in soil and water conservation or watershed management. The book will also serve as a reference for professionals, environmental consultants, and policy makers engaged in soil and water conservation related fields.

*Nanotechnology* - Rakesh K. Sindhu 2021-05-28

This book gives a summary of the rapidly growing field of nanotechnology and includes materials and technologies that help in developing particles of various sizes, which can be utilized in different areas of research. It discusses the role of nanotechnology in different aspects, such as healthcare, especially in target-specific drug therapy for managing a number of medical disorders; agriculture, for developing smart field systems; and food industry, for improving and stabilizing the quality, healthiness, and shelf life of food. Being multidisciplinary, this book brings together the principles, theory, practices, and applications of not only nanotechnology but also those of nanobiotechnology, pharmaceuticals, food packaging, biosensors, and electronic devices. The book will be an exhilarating read for advanced undergraduate- and graduate-level students, general readers interested in nanotechnology, and researchers in chemistry, biology, and engineering. The scope of the book extends from basic research in physics, chemistry, and biology, including computational work and simulations, through to

the development of new devices and technologies for applications in a wide range of industrial sectors (including information technology, medicine, manufacturing, high-performance materials, and energy and environmental technologies). It covers organic, inorganic, and hybrid materials and is an interdisciplinary book.

**Social Science Success Book 8 (A.Y. 2023-24) Onward** - Tinkoo Bhattacharjee 2023-05-20

The series SOCIAL SCIENCE SUCCESS is a set of three books for Classes 6 to 8. It is aligned with National Education Policy, 2020 and is in accordance with National Curriculum Framework (NCF). Each book in the series is supported with Online Support, Teacher's Resource Book and E-book for teachers. Each book in the series is divided into three sections – History, Geography & Social and Political Life. Our attempt, in this series, is to capture the interest and arouse genuine curiosity in the learners through presentation of facts and concepts in a simple and lucid style, infused with numerous original illustrations and photographs. Utmost care has been taken to encapsulate in the series the key parameters laid down in National Education Policy (NEP) 2020. The NEP places the learner at the heart of the teaching-learning process. In recent years, there has been a paradigm shift towards designing a learner-centric curriculum that is based on an activity-based approach. There is also an equal emphasis

on equipping young learners with essential twenty-first-century skills. The text as well as the exercises in the book promote the holistic development of the learners. Besides, there is a lot of emphasis on enhancing the creativity, critical thinking, and communication and collaboration skills of learners. Salient Features of the Course Books : Learner-centred with a comprehensive approach The content is written in a learner-friendly language. *Soil Fertility Management in Agroecosystems* - Amitava Chatterjee 2020-05-19

In *Soil Fertility Management in Agroecosystems*, Editors

Amitava Chatterjee and David Clay provide a thoughtful survey of important concepts in soil fertility management. For the requirements of our future workforce, it is imperative that we evolve our understanding of soil fertility. Agronomists and soil scientists are increasingly challenged by extreme climatic conditions. Farmers are experimenting with integrating cover crops into rotations and reducing the use of chemical fertilizers. In other words, there is no such a thing as a simple fertilizer recommendation in today's agriculture. Topics covered include crop-specific nutrient management, program assessment, crop models for decision making, optimization of fertilizer use, cover crops, reducing nitrous oxide emissions, natural abundance techniques, tile-drained conditions, and soil biological fertility.
