Shadow and Substance - Rudine Sims 1982

The purpose of this monograph is to provide classroom teachers, librarians, and teacher educators in the field of children's literature with information that will enable them to make better informed selections of recent literature for and about Afro-Americans. The first chapter of the work places contemporary realistic fiction about Afro-Americans in a sociocultural and historical context, while the second chapter discusses the "social conscience" books that are written primarily to help whites know the

condition of blacks in the United States. The third chapter reviews "melting pot" books that were written for both blacks and whites on the assumption that both groups need to be informed that nonwhite children are exactly like other American children--except for their skin color. The fourth chapter examines "culturally conscious" books that were written for Afro-American readers and that attempt to reflect both the uniqueness and the universal humaneness of the Afro-American experience from the perspective of an Afro-American child or family. The fifth chapter presents a brief overview of the work of five Afro-American writers who have made significant contributions to children's fiction since 1965, and the final chapter summarizes the current status of children's fiction about Afro-Americans and suggests some areas yet to be covered in fictional works. 101 Healing Stories - George W. Burns
2001-04-05

Using folktales and other metaphoric stories can aid the healing process Just as stories have the power to enrich our lives, shape the way we perceive and interact with the world, and reveal the wonders of the human spirit, so too can they play an important and potent role in therapy--helping people develop the skills to cope with and survive a myriad of life situations. 101 Healing Stories celebrates the rewards of using parables, fables, and metaphors in therapy as a nonthreatening means to help clients discuss problems and consider possible solutions. George W. Burns examines the healing value of using metaphors in therapy and provides 101 inspirational story ideas that therapists can adapt to share with clients for effecting change. He explains how to tell stories that engage the client, how to make them metaphoric, and where to find sources for such tales. Burns also shows readers how to build stories from personal experiences or their own imagination to use in session, making this thoughtful book an especially creative therapeutic tool. Contains 101 stories grouped by desired therapeutic outcome, highlighting each story's applicability to a

variety of presenting problems Offers talking points for therapists such as speci?c insights, outcomes, or skills that are illustrated by the stories Features shaded tabs that index stories by therapeutic outcome for easy reference and selection

We are what We Celebrate - Amitai Etzioni 2004-12

How did Martin Luther King Jr.'s birthday become a national holiday? Why do we exchange presents on Christmas and Chanukah? What do bunnies have to do with Easter? How did Earth Day become a global holiday? These questions and more are answered in this fascinating exploration into the history and meaning of holidays and rituals. Edited by Amitai Etzioni, one of the most influential social and political thinkers of our time, this collection provides a compelling overview of the impact that holidays and rituals have on our family and communal life. From community solidarity to ethnic relations to religious traditions, *We Are What We Celebrate* argues that holidays such as Halloween, Fourth of July, Thanksgiving, New Year's Eve, and Valentine's Day play an important role in reinforcing, and sometimes redefining, our values as a society. The collection brings together classic and original essays that, for the first time, offer a comprehensive overview and analysis of the important role such celebrations play in maintaining a moral order as well as in cementing family bonds, building community relations and creating national identity. The essays cover such topics as the creation of Thanksgiving as a national holiday; the importance of holidays for children; the mainstreaming of Kwanzaa; and the controversy over Columbus Day celebrations. Compelling and often surprising, this look at holidays and rituals brings new meaning to not just the ways we celebrate but to what those celebrations tell us about ourselves and our

communities. Contributors: Theodore Caplow, Gary Cross, Matthew Dennis, Amitai Etzioni, John R. Gillis, Ellen M. Litwicky, Diana Muir, Francesca Polletta, Elizabeth H. Pleck, David E. Proctor, Mary F. Whiteside, and Anna Day Wilde.

Examining The Wire - Ryan Twomey
2020-07-31

This book examines *The Wire*'s authenticity and its establishment of the series realism. Along with tracing creator David Simon's onscreen critique of numerous failed American institutions, the book focuses on the connection between authenticity and realism in three distinct areas: language, character, and location. While it is shown that *The Wire* is indeed authentic, the study examines occasions where the language, characters, and even the location are 'curated'. Yet, while we can witness these moments of curation, it is *The Wire*'s unflinching focus on authentic dialogue, authentic characterisation, and an authentic location that makes the series the most realistic, and arguably the best, television show of all time.

My Naughty Contact Lens - Juliette Vignola
2014-10-04

"My contact lens is my best friend, he helps me to see clearly. But sometimes... every now and then, he troubles me quite dearly!" All of our young children in lenses struggle with the same complaints about lenses - sometimes they don't go in or come out easily, they get dirty, they need a drop. Making light of these situations in a fun way can ease the child's mind and help to make the "lens drama" easier to bear. This fun little rhyme will resonate with contact-lens wearing kiddos and help them to see that they are not alone in their sometimes difficult experiences with contact lenses.

Subject to Change - Deirdre Boyle
1997-03-27

Before the Internet, camcorders, and hundred-channel cable- systems--predating the Information Superhighway and talk of cyber-democracy--there was guerilla television. Part of the larger alternative media tide which swept the country in the late sixties, guerilla television emerged

when the arrival of lightweight, affordable consumer video equipment made it possible for ordinary people to make their own television. Fueled both by outrage at the day's events and by the writings of people like Marshall McLuhan, Tom Wolfe, and Hunter S. Thompson, the movement gained a manifesto in 1971, when Michael Shamberg and the raindance Corp. published *Guerilla Television*. As framed in this quixotic text, the goal of the video guerilla was nothing less than a reshaping of the structure of information in America. In *Subject to Change*, Deirdre Boyle tells the fascinating story of the first TV generation's dream of remaking television and their frustrated attempts at democratizing the medium. Interweaving the narratives of three very different video collectives from the 1970s--TVTV, Broadside TV, and University Community Video--Boyle offers a thought-provoking account of an earlier electronic utopianism, one with significant implications for today's debates over free speech, public discourse, and the information explosion.

Inclusion in Action 6e - Iva Strnadová
2021-10-01

How can classroom teachers effectively differentiate learning and teaching programs to provide for the needs of every student in their class? *Inclusion in Action* begins by asking, "Why include all students in regular classrooms?" and then shows how this can be done. It outlines the philosophy of inclusive education and focuses on the use of individualised planning and effective teaching practices to maximise learning outcomes within positive and productive environments. This sixth edition is grounded in evidence-based practices, Universal Design for Learning (UDL), and Response to Intervention. Expansion and focus on these educational frameworks and approaches is in line with the research evidence about what works for students with diverse abilities across different education settings. Lying in Weight - Trisha Gura, PhD
2009-10-13

A girl with an eating disorder grows up. And then what? In this groundbreaking book, science journalist Trisha Gura explodes the myth that those who suffer from eating disorders, including anorexia nervosa and bulimia nervosa, are primarily teenage girls. In truth, twenty-five to thirty million American women twenty-five and older suffer from serious food issues, from obsessions with calorie counting to compulsions to starve then overeat. These diseases often linger from adolescence or emerge anew in the lives of adult women in ways that we are only now starting to recognize. Drawing on her own experience with anorexia, as well as the most up-to-date research and extensive interviews with clinicians and sufferers, Gura presents a startling, timely, and imperative investigation of eating disorders "all grown up," and offers hope through understanding.

The Gullah People and Their African Heritage - William S. Pollitzer 2005-11-01

The Gullah people are one of our most distinctive cultural groups. Isolated off the

South Carolina-Georgia coast for nearly three centuries, the native black population of the Sea Islands has developed a vibrant way of life that remains, in many ways, as African as it is American. This landmark volume tells a multifaceted story of this venerable society, emphasizing its roots in Africa, its unique imprint on America, and current threats to its survival. With a keen sense of the limits to establishing origins and tracing adaptations, William S. Pollitzer discusses such aspects of Gullah history and culture as language, religion, family and social relationships, music, folklore, trades and skills, and arts and crafts. Readers will learn of the indigo- and rice-growing skills that slaves taught to their masters, the echoes of an African past that are woven into baskets and stitched into quilts, the forms and phrasings that identify Gullah speech, and much more. Pollitzer also presents a wealth of data on blood composition, bone structure, disease, and other biological factors. This research not only underscores ongoing health challenges to the Gullah people but also helps to highlight their complex ties to various African peoples. Drawing on fields from archaeology and anthropology to linguistics and medicine, *The Gullah People and Their African Heritage* celebrates a remarkable people and calls on us to help protect their irreplaceable culture.
