Insurgent Terrorism - Victor Asal 2022

"Imagine getting on the bus to go from one major city to another. It had been a long week and all you wanted to do is get home and take a nap while doing that. Imagine falling asleep and enjoying the rest on the bus. Now imagine as the bus is driving up a mountain you wake to hearing someone scream out something incoherent and you can feel the bus swerve to the right

and through a road barrier and over the side of the mountain. Some of the people you are with on the bus fly out the window as it crashes down the mountain into a ravine while others fly around the bus slamming into each other, into metal and into shattering glass. As the bus slams down you can feel parts of your body break and you see other people die in front of you. You then lose consciousness. When you wake, you are lying outside the bus with glass and screaming people around you just above a bus that is now with its roof on the ground. Besides your own pain you can see the dead, the dying and the broken people all around you and dozens of people streaming down the valley to come help you and the people around you"--

[A Year with Nature](#) - Marty Crump 2018-11-11

A Year with Nature is an almanac like none you've ever seen: combining science and aesthetics, it is a daily affirmation of the extraordinary richness of biodiversity and our enduring beguilement by its beauty. With a text by herpetologist and natural history writer Marty Crump and a cornucopia of original illustrations by Bronwyn Mclvor, this quirky quotidian reverie gazes across the globe, media, and time as it celebrates date-appropriate natural topics ranging from the founding of the National Park Service to annual strawberry, garlic, shrimp, hummingbird, and black bear festivals. With Crump, we mark the publication of classics like Carson's Silent Spring and White's Charlotte's Web, and even the musical premiere of

Tchaikovsky's Swan Lake. We note the discovery of the structure of DNA and the mountain gorilla, the rise of citizen science projects, and the work of people who've shaped how we view and protect nature—from Aristotle to E. O. Wilson. Some days feature US celebrations, like National Poinsettia Day and National Cat Day; others highlight country-specific celebrations, like Australia's Wombat Day and Thailand's Monkey Buffet Festival, during which thousands of macaques feast on an ornately arranged spread of fruits and vegetables. Crump also highlights celebrations that span borders, from World Wildlife Conservation Day to International Mountain Day and global festivities for snakes, sea turtles, and chocolate. Interweaving fascinating facts on everything from jellyfish bodies to monthly birth flowers with folkloric entries featuring the Loch Ness

Inventing American Tradition - Jack David Eller
2018-09-15

What really happened on the first Thanksgiving? How did a British drinking song become the US national anthem? And what makes Superman so darned American? Every tradition, even the noblest and most cherished, has a history, none more so than in the United States—a nation born with relative indifference, if not hostility, to the past. Most Americans would be surprised to learn just how recent (and controversial) the origins of their traditions are, as well as how those origins are often related to such divisive forces as the trauma of the Civil War or fears for American identity stemming from immigration

and socialism. In pithy, entertaining chapters, *Inventing American Tradition* explores a set of beloved traditions spanning political symbols, holidays, lifestyles, and fictional characters—everything from the anthem to the American flag, blue jeans, and Mickey Mouse. Shedding light on the individuals who created these traditions and their motivations for promoting them, Jack David Eller reveals the murky, conflicted, confused, and contradictory history of emblems and institutions we very often take to be the bedrock of America. What emerges from this sideways take on our most celebrated Americanisms is the realization that all traditions are invented by particular people at particular times for particular reasons, and that the process of “traditioning” is forever ongoing—especially in the land of the free.

Anti-Zionism and Antisemitism - Alvin H.

Rosenfeld 2019-01-09
Seventeen essays by scholars examining the links between anti-Semitism and attitudes toward Israel in the current political climate. How and why have anti-Zionism and antisemitism become so radical and widespread? This timely and important volume argues convincingly that today’s inflamed rhetoric exceeds the boundaries of legitimate criticism of the policies and actions of the state of Israel and conflates anti-Zionism with antisemitism. The contributors give the dynamics of this process full theoretical, political, legal, and educational treatment and demonstrate how these forces operate in formal and informal political spheres as well as domestic and transnational spaces. They offer significant historical and global perspectives of the problem, including how Holocaust memory and meaning have been reconfigured and how a singular and distinct project

of delegitimization of the Jewish state and its people has solidified. This intensive but extraordinarily rich contribution to the study of antisemitism stands out for its comprehensive overview of an issue that is both historical and strikingly timely.

The Return of the Russian Leviathan - Sergei Medvedev 2019-12-18
Russia's relationship with its neighbours and with the West has worsened dramatically in recent years. Under Vladimir Putin's leadership, the country has annexed Crimea, begun a war in Eastern Ukraine, used

chemical weapons on the streets of the UK and created an army of Internet trolls to meddle in the US presidential elections. How should we understand this apparent relapse into aggressive imperialism and militarism? In this book, Sergei Medvedev argues that this new wave of Russian nationalism is the result of mentalities that have long been embedded within the Russian psyche. Whereas in the West, the turbulent social changes of the 1960s and a rising awareness of the legacy of colonialism have modernized attitudes, Russia has been stymied by an enduring sense of superiority over its neighbours alongside a painful nostalgia for empire. It is this infantilized and irrational worldview that Putin and others have exploited, as seen most clearly in Russia's recent foreign policy decisions, including the annexation of Crimea. This sharp and

insightful book, full of irony and humour, shows how the archaic forces of imperial revanchism have been brought back to life, shaking Russian society and threatening the outside world. It will be of great interest to anyone trying to understand the forces shaping Russian politics and society today.

Views from Inside - Joy Egbert 2017-12-01

The goal of this text is to help teachers in diverse classrooms understand the importance of students' culture, languages, and schooling experiences to curriculum, assessment, and student achievement. Readers will learn about aspects of specific cultures and languages that are important to their understanding of their students, and they will discover that cultures that are often considered similar may not be so (and why they aren't). Finally, the text focuses on how teachers can integrate languages and

cultures into classrooms and how to account for students' backgrounds and funds of knowledge when devising tasks. The text starts with an introduction to language and culture that presents a research-based explanation of why these concepts are important for teachers to understand (Chapter 1). Then, the middle 28 chapters each address one country/culture. Each chapter starts with a school scenario in the US. Part 2 of each chapter includes evidence-based demographic and background data on the country, including historical events that may have an impact on our students and their families. Part 3 includes a look at education, schooling, and culture, including famous people, contributions to the world, personal characteristics, important religious information, focal customs, and other aspects that are important to cultural insiders. Part 4 is about

language and literacy traditions and how they relate to the culture, a number of words that teachers can learn (e.g., yes, no, thank you, please, hello), how the language is different from and similar to English, and what those differences and similarities might mean for English language learners from that culture. Part 5 comprises advice, resources, and ideas for teachers (for example, if it is an oral culture, the teacher might consider working with students on oral storytelling before transitioning to written stories, or incorporate both using technology). Each chapter also contains recommended readings and resources and short exercises that extend the chapter information. The final chapter presents parting notes for teachers and additional suggestions for addressing diversity.

The Experiment at Philadelphia - Kurt B.

Bakley 2016-08-29

The Experiment at Philadelphia Did Einstein discover God? If God created all things, then who Created God? What Was and Happened Before the Big-Bang. The Philadelphia Experiment was Einsteins experiment in which he had not only discovered, in 1943, the way to make things invisible and transport them at great speeds but also positively proven scientifically, physically, and spiritually that the Almighty God exists! He had literally discovered God! That

question, is there a god? Thats been going through peoples minds for so long, was discussed on the street corner, talked about on the porch on a hot summers night, and is now a proven fact. Yes, there is a god! Did Einstein in the Philadelphia Experiment make contact with UFO beings, who gave him advance knowledge of all things, which Einstein later destroyed, fearing what the world would do with that knowledge? Are the first fourteen chapters of this book about the advance knowledge Einstein received? Does it reveal the deepest, darkest secrets of God and Satan and how the universe works? Does it answer these questions? Many have asked since the beginning of the world: Which is known as the mystery of God? Why am I here? Whats the true meaning of life? How was everything created? Who are God and the devil? If God created all, who created God? If he is the first in

creation, where and how did he come into existence? Why does God allow evil in the world? Why do good things happen to bad people and bad things to good people? Why if we all came from Adam and Eve, who were Jewish are there Gentiles? Are Gentiles children of devils? Is that why the Jews are God's chosen race? Why in the Garden of Eden was the tree forbidden? How old is the earth? Why is God known as the Trinity? Why have religions, down through the ages, done such evil? What, when, and how did the big bang start? What happened to Satan? Who is he really, and what did he do in the past? What are his beliefs and ways? What is he and God literally made of? What is the meaning of the great pyramids and the sphinx? Is there scientific proof that God exists? Read this whole book for the answers to all these tough questions, and be sure to

read the introduction first before reading the rest of this book. It will help you better understand this whole book.

Ta Sba Balamil Ta Ch'ulel ~ On The Face Of The Earth And In The Soul - Bruce Rimell 2021-07-14

In 2014, artist and poet Bruce Rimell visited the city of San Cristóbal de las Casas, Chiapas, Mexico as part of a programme of arts cultural events and indigenous ceremonies. To prepare for this journey, Bruce chose not to learn Spanish but Tzotzil, the local Maya language, and to explore the indigenous people's beliefs, worldviews and ways of life. During these researches, he learned that the Tzotzil pay close attention to their dreams, and they consider that Westerners and non-

Maya Mexicans who ignore these night-time voyages live only half a life. This philosophy is expressed in the succinct Tzotzil phrase ta sba bamil ta ch'ulel, 'on the face of the Earth, and in the soul', meaning that human life must be lived in both waking life and dreams. This little book of strange verse accompanied by surreal sketches is an attempt to bridge the gap between the Mayan cosmovision and the Western world, and represents an integrated reflection of Bruce's journey to Chiapas. Featuring visits to contemporary highland Maya villages, archaeological sites and time spent with indigenous people - on the face of the Earth - as well as ceremonies, visions and dreams - and in the soul - that became increasingly influenced by Tzotzil insights into how to live, this collection of poetry expresses Bruce's effort to intimate something of that

fuller dreaming human life which for the indigenous people of Chiapas is as natural as events in the waking world. This delightfully designed volume features poems in both English and selected translations into the Tzotzil language, and it is the fourth in the new Xibalba Books Poetry Series aimed at republishing selected highlights from Bruce's vast poetry archive.

Women Leaders in Chaotic Environments - Şefika Şule Erçetin

2016-10-27

This book spotlights how women leaders behave in chaotic environments and features examples of women who have been key figures in determining complex socio-economic outcomes throughout history. Women leaders can be seen on many high-levels in the political arena, be they a prime minister, empress or opinion leader. From Kösem Sultan of the Ottoman Empire to Benazir Bhutto, women leaders have had an undeniable effect on modern history. Is it possible to understand the current role of women in politics in Turkey without the First Lady Emine Erdoğan? Can we analyze Europe's future without Angela Merkel? There are many different books about women leaders' biography or memoirs of persons who worked closely with them. However, until now, no in-depth scientific analysis of such women leaders with respect to chaos and complexity theory

has been available. This work represents a unique and important step towards filling this gap in research, and includes an epilogue presenting women's leadership model visualized by an eight-pointed star.

Houses of Civil War America - Hugh Howard 2014-11-04

A revealing historical and photographic tour of the homes of influential Civil War figures, including Robert E. Lee, Abraham Lincoln, Frederick Douglass, Clara Barton, Stonewall Jackson, and others. Timed to coincide with the 150th anniversary of the Civil War and a fitting sequel to Houses of the Presidents, Houses of Civil War America takes readers into the daily lives of the most important historical figures in the

nation-defining conflict. From modest abolitionist homes to the plantations of the antebellum south. Howard and Straus bring the most intimate moments of the war to life. With insightful narrative and gorgeous photography, *Houses of Civil War America* demonstrates -- through these landmark homes -- the nation we were and the nation we became.

Re-enchanting Nationalisms - Brad West 2015-04-13
This book provides original insight into the way we now engage and remember national history. Drawing on fieldwork and analysis of international case studies on state commemoration,

memorialization, recreational and tourism and times of disaster and crisis, the author demonstrates that not only does the nation frequently retain a strong cultural relevance in our global world but that the emergence of new forms of ritual and remembrance means that in many instances we are seeing the re-enchantment of nationalism. Drawing upon and developing an empirically informed cultural sociology, the author charts the distinctive qualities of these new national rites and how they feed into and advance particular cosmopolitan and orthodox national politics. Because social science has so often wrongly assumed the end of nationalism, the insights of this of the book about the possibilities and limitations of contemporary nationalism demand serious consideration by academics and also by policy makers and the general public.
