Understanding People - Trevor Butt
2017-03-14

Understanding People provides an overview and critique of current psychological assumptions about people and what differentiates them, and replaces them with a set of ideas taken from social constructionism. It begins with an examination of contemporary theories, then explores the critique of the social constructionists, before laying out the basis of an understanding of human action and behaviour, drawing on phenomenology and personal construct theory. Using everyday experience to illustrate the issues in personality theory (Is behaviour situation-specific? Why do we have a

sense of self? Is there an unconscious?), this book will breathe life into an area of psychology that is so often arid, and, in the eyes of students, divorced from their world.

Social Issues in China - Zhidong Hao
2013-08-23

Since 1978, the opening up and reform in China has brought tremendous economic and social changes. While China's economic progress has been commendable, the social problems that

go with economic changes have raised serious concerns. Some of those concerns are related to gender, ethnic, labor, and environmental issues. This book is about what has happened in these arenas in China since the opening up and reform in 1978. The study of gender, ethnicity, labor, and environment touches on some of the fundamental problems of modernization, especially the development of individuals and groups. So even though gender, ethnicity, labor, and environment seem to be separate issues, they are in fact related in some fundamental ways. That's what this book will explore as well. To understand is one thing and to do is another. This book also incorporates studies of NGO practices to see how NGOs have helped in transforming gender, ethnic,

labor, and environment interplay. Our study of NGOs in helping improve such interplay sheds light on how specifically civil society can prod the state to transform social relations for the better. This book is an attempt to assess the changes, both positive and negative, in gender, ethnic, ethnic, and environmental relations in China especially in the past 30 years of opening up and reform, especially regarding national identity formation. □

Goal-driven Learning - Ashwin Ram

1995

Brings together a diversity of research on goal-driven learning to establish a broad, interdisciplinary framework that describes the goal-driven learning process. In cognitive science, artificial intelligence, psychology, and education, a growing body of research supports the view that the learning process is strongly influenced by the learner's goals. The fundamental tenet of goal-driven learning is that learning is largely an active and strategic process in which the learner, human or machine, attempts to identify and satisfy its information needs in the context of its tasks and goals, its prior knowledge, its capabilities, and environmental opportunities for learning. This book brings together a diversity of research on goal-driven

learning to establish a broad, interdisciplinary framework that describes the goal-driven learning process. It collects and solidifies existing results on this important issue in machine and human learning and presents a theoretical framework for future investigations. The book opens with an overview of goal-driven learning research and computational and cognitive models of the goal-driven learning process. This introduction is followed by a collection of fourteen recent research articles addressing fundamental issues of the field, including psychological and functional arguments for modeling learning as a deliberative, planful process; experimental evaluation of the benefits of utility-based analysis to guide decisions about

what to learn; case studies of computational models in which learning is driven by reasoning about learning goals; psychological evidence for human goal-driven learning; and the ramifications of goal-driven learning in educational contexts. The second part of the book presents six position papers reflecting ongoing research and current issues in goal-driven learning. Issues discussed include methods for pursuing psychological studies of goal-driven learning, frameworks for the design of active and multistrategy learning systems, and methods for selecting and balancing the goals that drive learning. (Re)Imagining Elementary Social Studies - Sarah B. Shear 2018-01-01

The field of elementary social studies is a specific space that has historically been granted unequal value in the larger arena of social studies education and research. This reader stands out as a collection of approaches aimed specifically at teaching controversial issues in elementary social studies. This reader challenges social studies education (i.e., classrooms, teacher education programs, and research) to engage controversial issues--those topics that are politically, religiously, or are otherwise ideologically charged and make people, especially teachers, uncomfortable--in profound ways at

the elementary level. This reader, meant for elementary educators, preservice teachers, and social studies teacher educators, offers an innovative vision from a new generation of social studies teacher educators and researchers fighting against the forces of neoliberalism and the marginalization of our field. The reader is organized into three sections: 1) pushing the boundaries of how the field talks about elementary social studies, 2) elementary social studies teacher education, and 3) elementary social studies teaching and learning. Individual chapters either A) conceptually unpack a specific controversial issue (e.g. Islamophobia, Indian Boarding Schools, LGBT issues in schools) and how that issue should be/is

incorporated in an elementary social studies methods courses and classrooms or B) present research on elementary preservice teachers or how elementary teachers and students engage controversial issues. This reader unpacks specific controversial issues for elementary social studies for readers to gain critical content knowledge, teaching tips, lesson ideas, and recommended resources. Endorsement: (Re)Imagining Elementary Social Studies is a timely and powerful collection that offers the best of what social studies education could and should be. Grounded in a politics of social justice, this book should be used in all elementary social studies methods courses and schools in order to develop the kinds of teachers the world needs today. -- Wayne Au, Professor, University of

Social Work During COVID-19 - Timo Harrikari 2023-04-28

This book focusses on social work in the time of COVID-19. Social workers, their clients, and the organisations they represent have been affected by the pandemic in multiple ways. The pandemic and various efforts to curb the viral outbreak, such as face masks and lockdowns, have forced social workers to adapt to a 'new normal', launch new practices, mobilise social support and networks remotely, and above all, defend the most vulnerable populations. This requires an understanding of how social work and its clients are

prepared for, capable to respond to, and further, to recover from a societal crisis and human disasters, like a coronavirus pandemic. Divided into three parts, it provides a wealth of knowledge related to social work in different local and cultural contexts during the period of the global pandemic. With experienced social work researchers across a diversity of settings, contexts, and research traditions, the book is reflective of the 'glocal' response of social work. Offering new perspectives on challenges social workers have faced in dealing with the pandemic, it makes critical and timely insights into the innovations and adaptations in social work responses, with a strong empirical basis. It will be of interest to all social work scholars, students, and

practitioners.

Regenerative Sanitation - Thammarat
Koottatep 2019-02-15

This book proposes Regenerative Sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social-ecological, technological and resource systems. The preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between 'technological design' and the 'delivery platform' so as to achieve optimal and sustained sani-solutions. It also calls for the rethinking of sanitation to change the narrative

towards more progressive trajectories such as resource recovery and reuse rather than just amelioration. It explores the contributions to food security, livelihood support, urban regeneration, rural development and even local economies. A new paradigm, theory and ten principles for ensuring practical and effective sanitation solutions and management is presented. In addition is a unique conceptual framework applicable to both developed and developing countries, and to all stages, processes and cycles of delivering sanitation solutions that could critically evaluate, analyse and provide credible, adequate and appropriate sanitation solutions. All of which culminates in a strategic and practical application platform called 'Sanitation 4.0' that

advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation. Regenerative Sanitation: A New Paradigm For Sanitation 4.0 is inter and trans-disciplinary and encourages collaboration between engineers, scientists, technologists, social scientists and others to provide effective and practical user-centred solutions. It includes relevant case studies, examples, exercise and future research recommendations. It is written as both a textbook for researchers and students as well as a practitioners' guide for policymakers and professionals.

Social Problems - Jack Levin 2000

Brief History of Social Problems -
Frank J. McVeigh 2004
In this book, Frank McVeigh and
Loreen Wolfer take an historical
approach to examine the causes and
conflicts behind ten major social
problems that have existed for nearly
230 years. Using a critical thinking
perspective of the history,
sociology, politics, and economics of
the period, the authors analyze
social problems as a series of
conflicts between those with power
and those who were at one time
virtually powerless. Embedded in this
analysis is a discussion of how the

shift from a Gemeinschaft to
Gesellschaft society has influenced
how we address these problems. Using
these themes, McVeigh and Wolfer
provide thought-provoking insight
into the ways individuals, groups,
and social institutions change over
time, gaining or losing power. The
book contains a preface by Arthur
Shostak, Drexel University.
