Think you need to hit the gym hard-core and work until you're sore to lose weight and improve your fitness and strength levels? Think again. You could do all of that and more, and all you need is your own body weight to do it! Your body is an incredible machine, stronger and more capable than you know, and it is in this book that you will learn just how to improve and adapt your fitness routines to harness your bodyweight training exercises for improved results. When you have everything that you need right there in front of you (your own body), you owe it to yourself to take control of your fitness and physique and achieve the fitness goals you set for yourself. Contrary to popular belief, you don't need a lot of heavy equipment, free weights or machines to get the results you're so longing to see. The human body can provide enough resistance on its own to make a change. Power,

endurance, speed, flexibility, strength, coordination, balance and a whole host of other biomotor abilities can be built and developed over time by using the power of your own body to do it. Bodyweight training is growing in popularity. Even professional athletes are tapping into and harnessing the power of calisthenic training and making it a part of their fitness regime. Pushing, pulling, balancing, bending, twisting and squatting may look like simple bodyweight exercises, but they pack a power punch as you will soon see when you progress through the exercises in this book. Bodyweight training is the perfect option for those who don't have the time to hit the gym because they can be done anywhere and at any time, often requiring very minimal space to do it. That, combined with the lower risk of injury involved, makes bodyweight training the ideal technique for getting in shape without putting too much strain on the body. Sometimes, the only difference between success and failure is the existence of a good guide. With clear, step-by-step guidance instructions, this book is the going to be the only manual you will ever need to begin building a stronger, fitter, and better you. --- bodyweight strength training anatomy bodyweight scales bodyweight training bodyweight exercises bodyweight workout bodyweight training book bodyweight equipment bodyweight workout bodyweight workouts for men bodyweight training equipment you are your own gym the bible of bodyweight ex... complete guide to bodyweight training suspended bodyweight training anatomy of bodyweight exercises the complete guide to bodyweight training womens bodyweight training stack 52 bodyweight dinosaur bodyweight training complete guide bodyweight bodyweight cables bodyweight anatomy bodyweight vest bodyweight training bodyweight beast bodyweight bars bodyweight rack bodyweight rows rings bodyweight bodyweight bodyweight master dk bodyweight training bodyweight burn bodyweight wod complete calisthenics the ultimate guide to bod bodyweight straps bodyweight strength bodyweight gloves bodyweight bible bodyweight band bodyweight

A sense of fatigue dogs the fitness world. Many of the new programs that are tagged as groundbreaking are actually recycled ideas. Foundation offers something completely different for novices and athletes alike: a simple program with powerful and proven results that will remedy bad posture, alleviate back pain, and help readers break through fitness challenges and plateaus. Dr. Eric Goodman, a brilliant and dynamic young chiropractor, teams up with Peter Park, one of the top trainers in the United States, to radically redefine the core--shifting the focus from the front of the body to the back. Their groundbreaking approach works to strengthen the lower back and the full posterior chain and correct poor movement patterns by addressing mechanical imbalances and weaknesses. Foundation training involves simple movement patterns and is equipment free, creating maximum power, flexibility, and endurance. Word-of-mouth enthusiasm has inspired both Hollywood luminaries and world-class athletes to make Foundation training the core of their fitness programs. Eric and Peter's client list has grown exponentially to include Lance Armstrong, NBA star Derek Fisher, world-champion surfer Kelly Slater, and actor Matthew McConaughey.
